Subject Index

A

ABCD1 gene
  mammalian peroxisomes and, 317, 319, 321, 324
ABC transporter
  capsular polysaccharides in *E. coli* and, 54, 57–59
  mammalian peroxisomes and, 295, 297, 322–24
Abd-B gene
  chromosome and plasmid segregation, 224
Acatalasemia
  mammalian peroxisomes and, 316, 318, 321
Acceptors
  endogenous
    capsular polysaccharides in *E. coli* and, 56–57
Accessory proteins
  site-specific recombination and, 579–82
2′-*O*-Acetyl-ADP-ribose
  sirtuins and, 435–36, 441–42
Acetylation
  gene expression regulation and chromatin modifications, 243
  sirtuins and, 455, 457
ACOX1 gene
  mammalian peroxisomes and, 318, 320
Actins
  animal cytokinesis and, 547, 552, 555–56, 558
  axonal transport and Alzheimer's disease, 610, 618
  death-associated protein kinases and, 194, 202, 206
  dynamic filaments of bacterial cytoskeleton and, 467, 476–83
Activation
  cold-adapted enzymes and, 405, 408
  Hsp90 molecular chaperone and, 289
  LKB1-dependent signaling pathways and, 146–49
  sirtuins and, 454, 460–61
  site-specific recombination and, 569
Active site
  asparagine synthetase chemotherapy and, 640–41
  cold-adapted enzymes and, 403
  dynamic filaments of bacterial cytoskeleton and, 471–72
  eukaryotic signaling circuits and, 658, 660–64
  proton transfer through respiratory complexes and, 171–74
  ribonucleotide reductases and, 687–90, 698–99
Activity-stability relationship
  cold-adapted enzymes and, 415–17
Actomyosin
  animal cytokinesis and, 552, 555–56
Acute lymphoblastic leukemia (ALL)
  asparagine synthetase chemotherapy and, 629–49
N-Acylsulfonamide derivatives
  asparagine synthetase chemotherapy and, 642, 649
ADAM protein
  axonal transport and Alzheimer's disease, 616
Adaphostin
  tyrphostins and other tyrosine kinase inhibitors, 97–98
Adaptor proteins
  eukaryotic signaling circuits and, 658–59, 669–70, 672
"Addiction module"

chromosome and plasmid segregation, 226
Adenylate kinase
cold-adapted enzymes and, 420–22
Adipose tissue
obesity-related derangements in metabolic regulation and, 367, 370–74
ADP/ATP carrier
mitochondrial, 713–37
ADP-ribosyl transferase
sirtuins and, 445–46
ADPR-peptidyl-imidate
sirtuins and, 450–52
Adrenomyeloneuropathy
mammalian peroxisomes and, 321
AG 957
tyrphostins and other tyrosine kinase inhibitors, 97–98
AG 1112
tyrphostins and other tyrosine kinase inhibitors, 97, 99
AG 1318
tyrphostins and other tyrosine kinase inhibitors, 97
AG 1478
tyrphostins and other tyrosine kinase inhibitors, 99
Aging
axonal transport and Alzheimer's disease, 607–21
sirtuins and, 444–45
AGPS gene
mammalian peroxisomes and, 303, 316, 318
Agrobacterium spp.
capsular polysaccharides in *E. coli* and, 52
AGXT gene
mammalian peroxisomes and, 316
AHA α-amylase
cold-adapted enzymes and, 405–7, 409–16, 418–20, 422, 424–27
Aha1 protein
Hsp90 molecular chaperone and, 285–86
Akt protein
signaling pathways in skeletal muscle remodeling and, 27–28
Alcaligenes eutrophus
NADH:quinone oxidoreductase (complex I) and, 76–77
Alcohol dehydrogenase
protein motion and catalysis, 519–20, 530–35
Alkaline phosphatase
cold-adapted enzymes and, 406, 411–12, 415–16, 422–23, 426
Allelic determinants
capsular polysaccharides in *E. coli* and, 47
Allosteric regulation
ribonucleotide reductases and, 681, 694–99
All-*trans*-retinal
rhodopsin and, 743, 748–49
ALT pathway
break-induced replication and recombinational telomere elongation in yeast, 131–32
Alzheimer's disease
amyloid structures and protein misfolding, 333, 336–37, 356
axonal transport and, 607–21
LKB1-dependent signaling pathways and, 155
AMACR gene
mammalian peroxisomes and, 316, 318–19, 321
amber gene
history of research, 9, 11–12
Amidohydrolases
N-terminal
asparagine synthetase chemotherapy and, 632
Amino acid response pathway
asparagine synthetase chemotherapy and, 635–37
5-Aminoimidazole-4-carboxamide riboside (AICAR)
LKB1-dependent signaling pathways and, 147–48
AMN107
tyrphostins and other tyrosine kinase inhibitors, 98–99
AMP-activated protein kinase (AMPK)
LKB1-dependent signaling pathways and, 137, 144, 146–51, 156–57
α-Amylase
cold-adapted enzymes and, 405–7, 409–16, 418–20, 422, 424–27
obesity-related derangements in metabolic regulation and, 369
Amyloid-β peptide
axonal transport and Alzheimer's disease, 614–16, 618–21
Amyloid structures
protein misfolding and human disease
aggregation rate, 353–54
charge, 353
common determinants, 356–57
conformational states, 350–52
disease, 335–41
exploitation, 339
fibril formation, 346–52

future research, 360
globular proteins, 349–50
hydrophobicity, 353
introduction, 334–35
nonchromosomal genetic elements, 339–41
normal biology, 335–41
nucleated growth, 347
oligomers, 347–49
partial unfolding, 349
pathogenesis of protein deposition diseases, 357–59
perspectives, 359
polymorphism, 345–46
polypeptide chains, 350–52
protein aggregation, 336–38
protofibrils, 347–49
secondary structure, 353
sequence, 352–57
solid-state NMR, 341–43
structure of amyloid fibrils, 341–46
summary points, 359–60
toxicity of prefibrillar aggregates, 358–59
unstructured aggregates, 348–49
various systems, 344–45
X-ray crystallography, 343
Anabaena spp.
site-specific recombination and, 569
Anabolic steroids
signaling pathways in skeletal muscle remodeling and, 32
Anillin
animal cytokinesis and, 547
Annexins
animal cytokinesis and, 548
Anoikis
death-associated protein kinases and, 203
Anterograde transport
axonal transport and Alzheimer's disease, 610–11, 617
ant genes
gene expression regulation and chromatin modifications, 248
mammalian peroxisomes and, 324
Antimycin A
transmembrane traffic in cytochrome b_6f complex and, 781–82
Aph-1 protein
axonal transport and Alzheimer's disease, 617
Aplysia californica
amyloid structures and protein misfolding, 340
Apoptosis
death-associated protein kinases and, 189–207
sirtuins and, 436, 439–40
tyrphostins and other tyrosine kinase inhibitors, 93, 97
APPL gene
axonal transport and Alzheimer's disease, 617
APP protein
axonal transport and Alzheimer's disease, 612, 615–19, 621
Aquaspirillum arcticum
cold-adapted enzymes and, 420–21
Aquifex aeolicus
NADH:quinone oxidoreductase (complex I) and, 72
Arabidopsis thaliana
NADH:quinone oxidoreductase (complex I) and, 73, 81
transmembrane traffic in cytochrome b_6f complex and, 782
Archaea
cold-adapted enzymes and, 404, 409, 419, 423–24, 427
Archaeoglobus fulgidus
NADH:quinone oxidoreductase (complex I) and, 76
sirtuins and, 438
Arginine-mediated interactions
cold-adapted enzymes and, 424
Arginine methyltransferases
histone
gene expression regulation and chromatin modifications, 258–59
Aromatic interactions
cold-adapted enzymes and, 424–25
Arp1 protein
axonal transport and Alzheimer's disease, 610
Arthrobacter spp.
cold-adapted enzymes and, 406, 412, 415–16, 420–21
AS-B enzyme
asparagine synthetase chemotherapy and, 642, 646
Asparagine synthetase (ASNS) chemotherapy
active site, 640–41
amino acids, 635–37
cell cycle, 634–35
chemical constraints, 640–41
childhood ALL, 637–39
drug-resistant leukemia, 634–39
enzyme inhibitors, 639–46
expression, 637–39
future research, 649
gene transcription, 635–37

introduction, 630–31
kinetic mechanism, 633–34
nanomolecular inhibitor, 643–46
perspectives, 646–48
related resources, 649
structure, 631–33, 640–41
sulfonamide derivatives, 641–43
summary points, 648–49
Aspartate aminotransferase
cold-adapted enzymes and, 409
β-Aspartyl-AMP
asparagine synthetase chemotherapy and, 633–34
Atomic force microscopy (AFM)
amyloid structures and protein misfolding, 336, 347
ATPases
chromosome and plasmid segregation, 226–27
dynamic filaments of bacterial cytoskeleton and, 483–86
Hsp90 molecular chaperone and, 271–90
ATP cone
ribonucleotide reductases and, 698–99
ATP mimics
tyrphostins and other tyrosine kinase inhibitors, 99
Atractyloside
mitochondrial ADP/ATP carrier and, 715
Atrophy
signaling pathways in skeletal muscle remodeling and, 28, 31–32
att genes
site-specific recombination and, 579–80, 582, 599
Autophagy
death-associated protein kinases and, 189, 195, 198, 200, 206
Axonal transport
Alzheimer's disease and
aging, 612–13
future research, 621
introduction, 608
mechanisms of axonal transport, 610–11
neurodegenerative diseases, 613–14
overview of Alzheimer's disease, 614–16
overview of axonal transport, 608–9
pathogenesis of Alzheimer's disease, 617–21
pathology of Alzheimer's disease, 618–19
proteins, 617, 609–10
regulation of axonal transport, 611–12
summary points, 621
Azotobacter spp.
cold-adapted enzymes and, 406
history of research, 5

B

BACE enzyme
axonal transport and Alzheimer's disease, 615–19
Bacillus spp.
cold-adapted enzymes and, 406, 411, 413, 416, 420–21
Bacillus subtilis
chromosome and plasmid segregation, 213–14, 223–24, 229
cold-adapted enzymes and, 406, 417
dynamic filaments of bacterial cytoskeleton and, 469, 479–82, 485
NADH:quinone oxidoreductase (complex I) and, 77, 79
site-specific recombination and, 569, 595
Base exchange
sirtuins and, 447–48
Basic leucine zipper transcription factor (bZIP)
asparagine synthetase chemotherapy and, 635–36
Bcr-Abl kinase
tyrphostins and other tyrosine kinase inhibitors, 97–99
β-Lactamase
cold-adapted enzymes and, 409
β-Lactam synthetase (BLS)
asparagine synthetase chemotherapy and, 633, 640, 642, 648
BHK *ts11* cells
asparagine synthetase chemotherapy and, 634–35
Bitborax gene
gene expression regulation and chromatin modifications, 248
Blebbistatin
animal cytokinesis and, 557
BMS-354825
tyrphostins and other tyrosine kinase inhibitors, 98–99
Bombyx mori
amyloid structures and protein misfolding, 340
Bongkrekic acid
mitochondrial ADP/ATP carrier and, 716, 732
Borealin
animal cytokinesis and, 548
Borrelia burgdorferi
site-specific recombination and, 582

Bos taurus
NADH:quinone oxidoreductase (complex I) and, 73
Brain
axonal transport and Alzheimer's disease, 607–21
Branchiostoma spp.
rhodopsin and, 748
BRCA1/2 genes
animal cytokinesis and, 560
history of research, 14
Breakage
strand
site-specific recombination and, 567, 570–72, 584–86
Break-induced replication
recombinational telomere elongation in yeast and
ALT pathway, 131–32
break-induced replication, 112–16
chromosomal ends, 129–30
growth senescence, 116–19
introduction, 112
mitochondrial DNAs, 130
molecular mechanisms, 115–16
recombinational telomere elongation, 119–30
repair of nontelomeric broken ends, 112–15
"roll and spread" model, 123–28
survivor formation by recombination-based mechanisms, 119–23
telomerase, 128–32
terminal palindromes, 130–31
BRSK kinases
LKB1-dependent signaling pathways and, 154–56
BtubA/B proteins
dynamic filaments of bacterial cytoskeleton and, 475–76

C

Caenorhabditis elegans
animal cytokinesis and, 544, 547–48, 551–52
chromosome and plasmid segregation, 222–23
eukaryotic signaling circuits and, 667
LKB1-dependent signaling pathways and, 143–44, 147, 154–55
mammalian peroxisomes and, 303, 311
NADH:quinone oxidoreductase (complex I) and, 73
sirtuins and, 440, 444
telomerase reverse transcriptase and, 496–98
Calcineurin
signaling pathways in skeletal muscle remodeling and, 19–20, 24–26
Calcium/calmodulin-dependent protein kinase (CaMK)
signaling pathways in skeletal muscle remodeling and, 19, 26–27
Calmodulin
death-associated protein kinases and, 190–91, 193
Calmodulin-regulated kinase kinase (CaMKK)
death-associated protein kinases and, 203, 205
Caloric restriction
sirtuins and, 441–45
Campylobacter jejuni
NADH:quinone oxidoreductase (complex I) and, 76
Cancer
animal cytokinesis and, 560
asparagine synthetase chemotherapy and, 629–49
LKB1-dependent signaling pathways and, 139, 149–52
tyrphostins and other tyrosine kinase inhibitors, 93–105
Candida spp.
amyloid structures and protein misfolding, 346
break-induced replication and recombinational telomere elongation in yeast, 130
cold-adapted enzymes and, 416
mammalian peroxisomes and, 324
sirtuins and, 436
Capsular polysaccharides in *E. coli*
ABC transporter, 57–59
additional proteins, 59–61
allelic determinants, 47
assembly, 45–62
biosynthesis, 45–62
chain elongation, 55–56
colanic acid, 44–47, 50–51
conclusions, 62
cps loci, 45–46
endogenous acceptor, 56–57
export, 57–59
future research, 63–64
genetics, 45–46, 54–55
group 1 capsules, 42–53
group 2 capsules, 44–62
group 3 capsules, 44–62
group 4 capsules, 42–44, 47–49, 52–53

initiation reactions, 56–57
introduction, 40–41
K antigens, 47
K_{LPS}, 49
kps loci, 54–55, 61
LPS, 42–44, 49
O antigens, 47
OMA proteins, 52–53
polymerization, 50–51
structures, 41–45
summary points, 62–63
surface association, 41–45
translocation, 52–53
type 4 secretion systems, 53
wza, 52–53
wzb, 52–53
wzc, 50–53
wzi, 53
wzy, 47–49
wzz, 49
Carboxyatractyloside
mitochondrial ADP/ATP carrier and, 715, 722
Cardiolipins
mitochondrial ADP/ATP carrier and, 715, 736
Cardiovascular disease
obesity-related derangements in metabolic regulation and, 367–68
Cargo proteins
axonal transport and Alzheimer's disease, 608–9, 611, 618, 620
CARM1 gene
gene expression regulation and chromatin modifications, 258
Carnitine palmitoyltransferase 1
obesity-related derangements in metabolic regulation and, 369
β-Carotene
transmembrane traffic in cytochrome b_6f complex and, 769, 787
Casein
cold-adapted enzymes and, 415
Caspases
death-associated protein kinases and, 206
Catabolism
mammalian peroxisomes and, 313
Catalysis
death-associated protein kinases and, 192–96
eukaryotic signaling circuits and, 664–69
Hsp90 molecular chaperone and, 274–75
NADH:quinone oxidoreductase (complex I) and, 83–84
protein motion and, 519–38
ribonucleotide reductases and, 687–90
sirtuins and, 454–56
site-specific recombination and, 577–78, 583
telomerase reverse transcriptase and, 499–500
CAT genes
mammalian peroxisomes and, 318, 321
Caulobacter crescentus
chromosome and plasmid segregation, 215, 223, 230, 233
dynamic filaments of bacterial cytoskeleton and, 480–81, 483
Cdc37 protein
Hsp90 molecular chaperone and, 284–85
Celecoxib
LKB1-dependent signaling pathways and, 152
Cell cycle
animal cytokinesis and, 549–51, 557
asparagine synthetase chemotherapy and, 634–35
chromosome and plasmid segregation, 211–37
dynamic filaments of bacterial cytoskeleton and, 467
Cell polarity
LKB1-dependent signaling pathways and, 154–56
Cell-surface biogenesis
capsular polysaccharides in *E. coli* and, 39–64
Cellulase
cold-adapted enzymes and, 406, 420–22
Centriolin
animal cytokinesis and, 548, 559–60
Centromeres
chromosome and plasmid segregation, 229–30
Ceramide
death-associated protein kinases and, 202, 206
CGP 57148
tyrphostins and other tyrosine kinase inhibitors, 97
CGP 76030
tyrphostins and other tyrosine kinase inhibitors, 98
Chaenocephalus aceratus
cold-adapted enzymes and, 406, 411
Chain elongation
capsular polysaccharides in *E. coli* and, 55–56
Chaperones
Hsp90 molecular chaperone and, 271–90
Chaplins
amyloid structures and protein misfolding, 340
Chemotherapy
asparagine synthetase chemotherapy and, 629–49

tyrphostins and other tyrosine kinase inhibitors, 93
Children
asparagine synthetase chemotherapy and, 629–49
Chitinases
cold-adapted enzymes and, 406–7
Chitobiase
cold-adapted enzymes and, 406, 409, 415, 424
Chlamydia trachomatis
ribonucleotide reductases and, 685–87
Chlamydomonas reinhardtii
NADH:quinone oxidoreductase (complex I) and, 73, 81
transmembrane traffic in cytochrome b_6f complex and, 769–72, 775, 777–79, 783–86
Chlorella spp.
transmembrane traffic in cytochrome b_6f complex and, 783–84
Chlorophyll *a*
transmembrane traffic in cytochrome b_6f complex and, 769
Cholesterol
mammalian peroxisomes and, 314–15
Chromatin
sirtuins and, 438
Chromatin immunoprecipitation (ChIP)
asparagine synthetase chemotherapy and, 636–37
Chromophores
rhodopsin and, 753–54
Chromosome segregation
dynamic filaments of bacterial cytoskeleton and, 467, 480
plasmid segregation and
addendum, 235–36
bacteria, 213–16, 223–30, 233
cell division, 233
centromeres, 229–30
chromosome segregation, 213–25, 229–30, 233–35
cohesin, 224–25, 231
cohesion, 217–20
coils, 233
condensation, 223–24
condensins, 222–25
counting chromosomes, 217
cytoskeleton, 233
DNA compaction, 224
DNA segregation, 223–24
DNA translocases, 233–35
dynamic protein rings, 233
eukaryotes, 216–22
faithful chromosome segregation, 233–35
future research, 237
genome maintenance, 233–35
introduction, 212–13
meiosis, 220–22
mitotic spindle, 231–32
nascent duplexes, 215–16
nucleoid, 213
oscillators, 233
pairing, 220–22
par, 229–30
partitioning, 226–29, 231
plasmid segregation, 225–33
proteases, 220
replication, 213–15, 217
separase, 220
site-specific recombinases, 233–35
summary points, 236–37
topoisomerases, 233–35
unpairing, 220–22
yeast plasmid, 230–33
Chronic myelogenous leukemia (CML)
tyrphostins and other tyrosine kinase inhibitors, 97–99
Ciona intestinalis
eukaryotic signaling circuits and, 667
Circular dichroism (CD)
amyloid structures and protein misfolding, 339, 348
cold-adapted enzymes and, 410, 417–18
cis-acting factors
eukaryotic signaling circuits and, 658
Citrate synthase
cold-adapted enzymes and, 416, 419–22, 424
c-Jun N-terminal kinase
eukaryotic signaling circuits and, 662
Cleavage furrow
animal cytokinesis and, 543–61
Client proteins
Hsp90 molecular chaperone and, 274–75, 289
Clostridium spp.
cold-adapted enzymes and, 411, 413
NADH:quinone oxidoreductase (complex I) and, 76
site-specific recombination and, 569
Coactivators
obesity-related derangements in metabolic regulation and, 375
signaling pathways in skeletal muscle remodeling and, 19, 27
Cochaperones

Hsp90 molecular chaperone and, 271–90
Coevolution
protein motion and catalysis, 525
Cofilin
animal cytokinesis and, 547, 557
axonal transport and Alzheimer's disease, 618
Cohesin
chromosome and plasmid segregation, 216–19, 224–25, 231–32
Cohesion
chromosome and plasmid segregation, 211, 215, 217–20
Coiled-coils
chromosome and plasmid segregation, 218, 225, 233
Colanic acid
capsular polysaccharides in *E. coli* and, 44–47, 50–51
Cold-adapted enzymes
activation energy, 408
activity, 405–10
activity-stability relationship, 415–17
arginine-mediated interactions, 424
aromatic interactions, 424–25
conformational stability, 412–14
core hydrophobicity, 421–22
denaturation, 414–15
electrostatic interactions, 423–25
flexibility, 417–27
folding funnel model, 419
future research, 427–28
global flexibility, 418–19
H-bonds, 423–24
introduction, 404–5
k_{cat}, 407–8
kinetic stability, 411–12
k_{uv}, 408–10
local flexibility, 418–19
miscellaneous factors, 426–27
salt bridges, 425
secondary structure elements, 425–26
stability, 410–17
structural adaptation, 419–27
summary points, 427
surface hydrophilicity, 423
surface hydrophobicity, 422–23
surface loops, 426
unfolding, 410
viscosity, 408
Colwellia maris
cold-adapted enzymes and, 406
COMPASS proteins
gene expression regulation and chromatin modifications, 251–53
Completion
animal cytokinesis and, 558–60
Condensation
chromosome and plasmid segregation, 211, 223–24
Condensins
chromosome and plasmid segregation, 217, 219, 222–25
Conformational change
cold-adapted enzymes and, 412–14
dynamic filaments of bacterial cytoskeleton and, 474–75
Hsp90 molecular chaperone and, 271–90
mitochondrial ADP/ATP carrier and, 732–34
protein motion and catalysis, 526–28, 532–33
Congo Red
amyloid structures and protein misfolding, 336, 339, 348, 350, 353, 358
Connectivity
eukaryotic signaling circuits and, 664–69
Conserved residues
mitochondrial ADP/ATP carrier and, 728
Contractile ring
animal cytokinesis and, 543–61
Cooperative assembly
dynamic filaments of bacterial cytoskeleton and, 472–73
Corepressors
signaling pathways in skeletal muscle remodeling and, 19
Coulombic interactions
cold-adapted enzymes and, 408
Coupling
proton transfer through respiratory complexes and, 171
Cowden's syndrome
LKB1-dependent signaling pathways and, 149–50
Cox-2 gene
LKB1-dependent signaling pathways and, 152
cps genes
capsular polysaccharides in *E. coli* and, 45–46
CPT-malonyl-CoA system
obesity-related derangements in metabolic regulation and, 375–76, 379
Crescentin
dynamic filaments of bacterial cytoskeleton and, 483
Cross talk
death-associated protein kinases and, 203

transmembrane traffic in cytochrome b_6f complex and, 780
Crossover site cleavage
site-specific recombination and, 586, 589–90
C-terminal domains
Hsp90 molecular chaperone and, 275–76
Cu^{2+}
proton transfer through respiratory complexes and, 168–69, 171
Curlin
amyloid structures and protein misfolding, 340
"Cut and separate" mechanism
chromosome and plasmid segregation, 218
Cyanidioschyzon merolae
chromosome and plasmid segregation, 222
Cyclins
animal cytokinesis and, 548
Cytochalasin
animal cytokinesis and, 557
Cytochrome b_6f complex
transmembrane traffic in
bound pigment molecules, 786–87
cyclic electron transport, 784–85
cytochrome f, 780–81
dimer organization, 772, 774
extrinsic domains on p side, 780
heme x, 783–86
intermonomer cross talk, 780
introduction, 770
lipids, 774–75
Mastigocladus laminosus, 774–75
oxidant-induced reduction, 775–77
prosthetic groups, 771–73
Q_p pocket, 778–79
quinol oxidation state, 775–81
quinone reduction site, 781–86
Rieske ISP, 780–81
structure, 771–75
subunit composition, 771–73
TDS ring-out conformation, 779–80
weakly bound protein components, 772
Cytochrome c oxidase
energy transduction and proton transfer through respiratory complexes, 165–80
Cytochrome c reductase
history of research, 4
Cytokinesis
animal
cancer, 560
classic models, 550–52
cleavage plane specification, 550–53
completion, 558–60
contractile ring assembly, 555–57
furrow ingression, 557–58
future research, 561
introduction, 544–46
microtubule organization, 553–55
molecular mechanisms, 552–53
molecules involved, 546–48
research approaches, 544–46
subprocesses, 549–60
summary points, 561
timing, 549–50
Cytoskeleton
chromosome and plasmid segregation, 233
death-associated protein kinases and, 201–3, 206
dynamic filaments of bacterial cytoskeleton and, 467–88

D

Deacetylation
signaling pathways in skeletal muscle remodeling and, 23–25
sirtuins and, 435–61
Death-associated protein kinases (DAPKs)
catalytic domain, 192–96
cross talk, 203
cytoskeleton, 201–3
extracatalytic domains, 193–96
function, 197–207
future research, 207
introduction, 190–91
molecular dissection, 199–201
nomenclature, 198–99
nonapoptotic functions, 203–4
phosphorylation, 191
regulation, 192–93, 196–97
related proteins, 191–97
signaling network, 204–7
structure, 192–96
substrates, 191
summary points, 207
n-Decylubiquinone
NADH:quinone oxidoreductase (complex I) and, 83
Degeneration
axonal transport and Alzheimer's disease, 607–21
Deletion
eukaryotic signaling circuits and, 655
site-specific recombination and, 567
Dementia

axonal transport and Alzheimer's disease, 607–21
Demethylation
gene expression regulation and chromatin modifications, 261–63
Denaturation
cold-adapted enzymes and, 411, 414–15
Density-function theory
ribonucleotide reductases and, 687
Desulfovibrio frvctosovorans
NADH:quinone oxidoreductase (complex I) and, 77
Diabetes
LKB1-dependent signaling pathways and, 151
obesity-related derangements in metabolic regulation and, 367–68, 382
signaling pathways in skeletal muscle remodeling and, 29–31
Differential scanning calorimetry (DSC)
cold-adapted enzymes and, 410, 417–18
Diffuse axonal injury
axonal transport and Alzheimer's disease, 614
dif genes
chromosome and plasmid segregation, 234
Dihydrofolate reductase
cold-adapted enzymes and, 410, 413–14
protein motion and catalysis, 519–30
Dimerization
Hsp90 molecular chaperone and, 275–76
mitochondrial ADP/ATP carrier and, 734–35
rhodopsin and, 743, 757–59
telomerase reverse transcriptase and, 505–7
transmembrane traffic in cytochrome b_6f complex and, 772, 774
Disintegrins
axonal transport and Alzheimer's disease, 616
Distributed surfaces
eukaryotic signaling circuits and, 661–62
Diversity
signaling pathways in skeletal muscle remodeling and, 21–22
DNA compaction
chromosome and plasmid segregation, 224
DNA invertases
site-specific recombination and, 567, 583–84, 596–98
DNA ligases
cold-adapted enzymes and, 409–13, 422, 426
history of research, 1, 10–11
DNA polymerase
history of research, 1, 4–12
DNA replication
history of research, 1, 12–15
DNA segregation
chromosome and plasmid segregation, 223–24
DNA translocases
chromosome and plasmid segregation, 233–35
dNTP pools
ribonucleotide reductases and, 681, 699–700
Docking
eukaryotic signaling circuits and, 658–64, 672
Domain discrimination
eukaryotic signaling circuits and, 665, 667–69
Dot1 gene
gene expression regulation and chromatin modifications, 256–57
Double-strand break repair
break-induced replication and recombinational telomere elongation in yeast, 111–32
D pathway
proton transfer through respiratory complexes and, 168–70, 175–77, 179
Drosophila melanogaster
animal cytokinesis and, 544–45, 547–48, 550, 557–59
asparagine synthetase chemotherapy and, 636
axonal transport and Alzheimer's disease, 617–21
chromosome and plasmid segregation, 218, 224
death-associated protein kinases and, 194
eukaryotic signaling circuits and, 667
gene expression regulation and chromatin modifications, 244–45, 248, 254–55, 262
history of research, 12–14
LKB1-dependent signaling pathways and, 143–44, 147, 154–56
NADH:quinone oxidoreductase (complex I) and, 73
sirtuins and, 444
telomerase reverse transcriptase and, 498
DRP-1 protein
death-associated protein kinases and, 191
Drug binding
Hsp90 molecular chaperone and, 273–74
Drug resistance
tyrphostins and other tyrosine kinase inhibitors, 98–100
Duchenne muscle dystrophy
signaling pathways in skeletal muscle remodeling and, 28–29
Duplexes
chromosome and plasmid segregation, 215–16
Dynactin

axonal transport and Alzheimer's disease, 610
Dynamic protein rings
chromosome and plasmid segregation, 233
Dynamics
cold-adapted enzymes and, 418
dynamic filaments of bacterial cytoskeleton and, 472
membrane proteins and, 709–10
Dynamin
animal cytokinesis and, 547
Dynein
axonal transport and Alzheimer's disease, 609–11

E

EcoB
history of research, 9
EF-2 protein
cold-adapted enzymes and, 410, 412
Effectors
sirtuins and, 441–42
EGFR kinase inhibitors
tyrphostins and other tyrosine kinase inhibitors, 99–101
Ehbadh gene
mammalian peroxisomes and, 321
Elastase
cold-adapted enzymes and, 420–21
Electron microscopy (EM)
animal cytokinesis and, 554, 558
Electron paramagnetic resonance (EPR)
transmembrane traffic in cytochrome b_6f complex and, 779
Electron transport
history of research, 4
NADH:quinone oxidoreductase (complex I) and, 69–87
proton transfer through respiratory complexes and, 165, 168–80
transmembrane traffic in cytochrome b_6f complex and, 769, 781–82, 784–85
Electrophoresis mobility shift analysis (EMSA)
asparagine synthetase chemotherapy and, 636
Electrostatic interactions
amyloid structures and protein misfolding, 353
cold-adapted enzymes and, 408–9, 423–25
protein motion and catalysis, 529
proton transfer through respiratory complexes and, 180
site-specific recombination and, 571, 574
Elongation
break-induced replication and recombinational telomere elongation in yeast, 111–32
gene expression regulation and chromatin modifications, 243
telomerase reverse transcriptase and, 493–512
"Embrace" mechanism
chromosome and plasmid segregation, 225
Encephalitozoon cuniculi
telomerase reverse transcriptase and, 498
Endocellulase
cold-adapted enzymes and, 406
Energy transduction
proton transfer through respiratory complexes and, 165–82
Enterobacteria
ribonucleotide reductases and, 692
Enthalpy
cold-adapted enzymes and, 403, 412–14
Entropy
cold-adapted enzymes and, 407, 412, 414, 422
Enzyme inhibitors
asparagine synthetase chemotherapy and, 629, 639–46
Epigenetic regulation
gene expression regulation and chromatin modifications, 263, 243
Equatorial relaxation
animal cytokinesis and, 557
Erbstatin
tyrphostins and other tyrosine kinase inhibitors, 96–97
Erlotinib
tyrphostins and other tyrosine kinase inhibitors, 99–100
Erwinia chrysanthemi
cold-adapted enzymes and, 406
Escherichia coli
amyloid structures and protein misfolding, 339–40, 354, 358
asparagine synthetase chemotherapy and, 631–32, 642
capsular polysaccharides and, 39–64
chromosome and plasmid segregation, 213–14, 216, 223, 227–28, 230, 233–34, 236
cold-adapted enzymes and, 411, 413
dynamic filaments of bacterial cytoskeleton and, 469–70, 477, 480–81, 484–85
history of research, 3–14
Hsp90 molecular chaperone and, 274–75, 279
NADH:quinone oxidoreductase (complex I) and, 72, 76–78, 84
protein motion and catalysis, 521–22, 524, 532

proton transfer through respiratory complexes and, 167
ribonucleotide reductases and, 683–90, 692–93, 698
site-specific recombination and, 568–69, 595
Est2 protein
telomerase reverse transcriptase and, 501, 509
Esterase
cold-adapted enzymes and, 417
Ether phospholipids
mammalian peroxisomes and, 302–5
Etoposide
death-associated protein kinases and, 202
Eucarya
cold-adapted enzymes and, 419, 427
Euglena gracilis
ribonucleotide reductases and, 683–84
Euplotes crassus
telomerase reverse transcriptase and, 498, 500, 505, 507
"Eversporting displacement"
gene expression regulation and chromatin modifications, 248
Evolution
dynamic filaments of bacterial cytoskeleton and, 467
NADH:quinone oxidoreductase (complex I) and, 69–87
protein motion and catalysis, 525
ribonucleotide reductases and, 681, 700–1
telomerase reverse transcriptase and, 496–98
Evolvability
eukaryotic signaling circuits and, 655–60, 674–75
Exchange
strand
site-specific recombination and, 567, 570–77, 584–86, 590–92
Excision
site-specific recombination and, 567, 569, 583, 592–96
Exercise adaptation
signaling pathways in skeletal muscle remodeling and, 19
Exit simulations
proton transfer through respiratory complexes and, 179–80
Exit/backflow pathway
proton transfer through respiratory complexes and, 178
Exonuclease I
history of research, 8, 9
Export
capsular polysaccharides in *E. coli* and, 39, 57–59
Extracatalytic domains
death-associated protein kinases and, 193–96
Extracellular signal-regulated kinase (ERK)
death-associated protein kinases and, 195, 197, 203, 205–6
eukaryotic signaling circuits and, 662–63
Extremophiles
cold-adapted enzymes and, 403

F

Faithful chromosome segregation
chromosome and plasmid segregation, 233–35
Fast-twitch myofibers
signaling pathways in skeletal muscle remodeling and, 21, 25
Fatty acid oxidation
mammalian peroxisomes and, 295–325
FEAR complex
chromosome and plasmid segregation, 219
Ferredoxin
transmembrane traffic in cytochrome b_6f complex and, 769, 784–85
Fibrillar aggregates
amyloid structures and protein misfolding, 333–60
Fibronectin
death-associated protein kinases and, 202–3
Filaments
bacterial cytoskeleton
actin, 476–77
actin homologues, 476–83
active site, 471–72
conformational change, 474–75
cooperative assembly, 472–73
crescentin, 483
FtsA, 482–83
FtsZ, 468–75
future research, 487–88
intermediate filament homologue, 483
introduction, 468
isodesmic assembly, 472–73
molecular function, 481–82
MreB, 479, 480–82
nucleotide exchange, 473–74
nucleotide hydrolysis, 476
ParM, 477–79
self-assembly in vitro, 469–70, 475–76

summary points, 486–87
tubulin homologues, 468–76
Walker A cytoskeletal ATPase, 483–86
Flavin mononucleotide
NADH:quinone oxidoreductase (complex I) and, 69–87
Flexibility
cold-adapted enzymes and, 403, 405, 409–10, 414–15, 417–27
Fluorescence recovery after photobleaching (FRAP)
dynamic filaments of bacterial cytoskeleton and, 469
Fluorescence resonance energy transfer (FRET)
animal cytokinesis and, 552
Folding funnel model
cold-adapted enzymes and, 419
Formin
animal cytokinesis and, 557
Fourier transform infrared (FTIR) spectroscopy
amyloid structures and protein misfolding, 345
proton transfer through respiratory complexes and, 170, 172–73, 180
FOXO factors
sirtuins and, 440
FRT genes
chromosome and plasmid segregation, 230, 234–35
Fts genes
dynamic filaments of bacterial cytoskeleton and, 467–75, 482–83
Functional modularity
eukaryotic signaling circuits and, 657–58
Fungi
amyloid structures and protein misfolding, 340
NADH:quinone oxidoreductase (complex I) and, 75, 86
sirtuins and, 437–45
Furrow ingression
animal cytokinesis and, 557–58

G

Gadus morhua
cold-adapted enzymes and, 406, 420–21
β-Galactosidase
cold-adapted enzymes and, 410, 424
gal genes
capsular polysaccharides in *E. coli* and, 46–47
gene expression regulation and chromatin modifications, 253, 260
Gating
proton transfer through respiratory complexes and, 170
Gefitinib
tyrphostins and other tyrosine kinase inhibitors, 99–100
Gelation-contraction
animal cytokinesis and, 555–56
Gene expression regulation
chromatin modifications by methylation and ubiquitination in
COMPASS, 251–53
enzymes, 246–48
future research, 263–64
histone arginine methyltransferases, 258–59
histone demethylation, 261–63
histone methylation, 245–63
histone methyltransferases, 256–58
introduction, 244
lysine, 248–58
MLL, 251–53
polycomb-group silencing, 254–56
posttranslational modification, 245–46
Set2, 253–54
summary points, 263–64
transcriptional memory, 260–61
ubiquitination, 254–56
X-chromosome inactivation, 254–56
Gene silencing
animal cytokinesis and, 543–46, 548, 552, 554, 556
gene expression regulation and chromatin modifications, 248–51, 254–56
sirtuins and, 435, 438, 440
Genomics
animal cytokinesis and, 543, 560
chromosome and plasmid segregation, 211–12, 233–35
NADH:quinone oxidoreductase (complex I) and, 69–87
Gentobiose
history of research, 9
Gin DNA invertase
site-specific recombination and, 583–84
Gleevec
tyrphostins and other tyrosine kinase inhibitors, 99
Global flexibility
cold-adapted enzymes and, 418–19
Global proteomic analysis (GPS)
gene expression regulation and chromatin modifications, 259

Globular proteins
amyloid structures and protein misfolding, 349–50
Glucanases
cold-adapted enzymes and, 409
Glucose-stimulated insulin secretion (GSIS)
obesity-related derangements in metabolic regulation and, 386–91, 393
β-Glucosidase
cold-adapted enzymes and, 416–17
GLUT4 transporter
signaling pathways in skeletal muscle remodeling and, 29
Glutamate dehydrogenase
cold-adapted enzymes and, 406, 411–12
"Glutamate trap"
proton transfer through respiratory complexes and, 172
Glutamine
asparagine synthetase chemotherapy and, 629–49
Glyceraldehyde-3-phosphate dehydrogenase
cold-adapted enzymes and, 422
Glycogen synthase kinase-3 (GSK3)
eukaryotic signaling circuits and, 663
Glycosyl hydrolase
cold-adapted enzymes and, 411–13
Glycosyltransferases
capsular polysaccharides in *E. coli* and, 39, 45, 49, 56, 60–61
Glyoxylates
mammalian peroxisomes and, 312–13
gnd genes
capsular polysaccharides in *E. coli* and, 46
GNPAT gene
mammalian peroxisomes and, 303, 316, 318, 320
G protein-coupled receptors
rhodopsin and, 743–62
Green fluorescent protein (GFP)
animal cytokinesis and, 559
death-associated protein kinases and, 194
Growth senescence
break-induced replication and recombinational telomere elongation in yeast, 116–19
GSK3β protein
axonal transport and Alzheimer's disease, 612, 618
GTPase-activating protein (GAP)
animal cytokinesis and, 552–53
GTPases
cold-adapted enzymes and, 406–7, 409, 411
Guanine nucleotide exchange factor (GEF)
animal cytokinesis and, 550, 552–53
Guanosine-5′-monophosphate synthetase
asparagine synthetase chemotherapy and, 633

H

Haemophilus influenzae
capsular polysaccharides in *E. coli* and, 44
chromosome and plasmid segregation, 229
Half-of-the-sites reactivity
site-specific recombination and, 577–78
"Hand-in-hand" mechanism
chromosome and plasmid segregation, 225
Heat lability
cold-adapted enzymes and, 403–28
Helicobacter pylori
NADH:quinone oxidoreductase (complex I) and, 76
site-specific recombination and, 569, 583
Heme
proton transfer through respiratory complexes and, 168, 170–72, 174, 180–81
transmembrane traffic in cytochrome b_6f complex and, 769, 783–86
Herpes simplex virus type 1 (HSV-1)
history of research, 14–15
Heterochromatic silencing
gene expression regulation and chromatin modifications, 248–51
HET-s protein
amyloid structures and protein misfolding, 340
HIEF operon
ribonucleotide reductases and, 692
Hin DNA invertase
site-specific recombination and, 583–84
Histone deacetylases (HDAC)
signaling pathways in skeletal muscle remodeling and, 23–25
Histones
gene expression regulation and chromatin modifications, 243, 245–56, 259–63
sirtuins and, 438–39
HM genes
chromosome and plasmid segregation, 224
sirtuins and, 437, 441, 454
Holliday junctions
site-specific recombination and, 567, 572–74, 582
Homeostasis
obesity-related derangements in metabolic regulation and, 375

Homo sapiens
amyloid structures and protein misfolding, 340
NADH:quinone oxidoreductase (complex I) and, 73
sirtuins and, 439
telomerase reverse transcriptase and, 496–97, 504
box genes
gene expression regulation and chromatin modifications, 253–54, 257
NADH:quinone oxidoreductase (complex I) and, 76, 78
HSD17B4 gene
mammalian peroxisomes and, 318, 321
Hsp90 molecular chaperone
activation, 289
Aha1, 285–86
ATP, 279–81
ATPases, 276–79, 283–86
catalytic loop, 274–75
Cdc37, 284–85
client proteins, 274–75, 289
cochaperones, 281–89
complexes, 281–89
conformation, 273–81
C-terminal domain, 275–76
dimerization, 275–76
drug binding, 273–74
future research, 290
introduction, 272–73
middle segment, 274–75
N-terminal domain, 273–74
nucleotide binding, 273–74
p23/Sba1, 286–89
perspectives, 272–73
structure, 273–81
summary points, 290
TPR-domain cochaperones, 281–83
Hydrogen bonds
cold-adapted enzymes and, 409, 423–24
energy transduction and proton transfer through respiratory complexes, 165, 169, 178–80
protein motion and catalysis, 529
Hydrophilicity
cold-adapted enzymes and, 423
Hydrophobicity
amyloid structures and protein misfolding, 353
cold-adapted enzymes and, 408–9, 412, 419, 421–23, 425
Hydrophobin
amyloid structures and protein misfolding, 340
Hyperoxaluria type 1
mammalian peroxisomes and, 316, 318
Hypertension
obesity-related derangements in metabolic regulation and, 367–68
Hypertrophy
signaling pathways in skeletal muscle remodeling and, 19, 26, 28

I

IDH1 gene
mammalian peroxisomes and, 301
Immune disorders
tyrphostins and other tyrosine kinase inhibitors, 93, 104–5
IMS-binding sites
mitochondrial ADP/ATP carrier and, 730–31
Induced fit
site-specific recombination and, 598–99
Inhibitors
NADH:quinone oxidoreductase (complex I) and, 82–83
sirtuins and, 461
tyrphostins and other tyrosine kinase inhibitors, 93–105
Initiation
capsular polysaccharides in *E. coli* and, 56–57
Insertion
eukaryotic signaling circuits and, 655
Insulin-like growth factor (IGF)
signaling pathways in skeletal muscle remodeling and, 27–28
Insulin resistance
obesity-related derangements in metabolic regulation and, 376–78, 386–91, 393
Integrases
site-specific recombination and, 567, 570, 598–99
Integration
eukaryotic signaling circuits and, 657
site-specific recombination and, 567, 569, 583
Integrins
death-associated protein kinases and, 203, 206
Intercellular bridge
animal cytokinesis and, 553
Interferon (IFN)
death-associated protein kinases and, 196
Intermediate filaments
dynamic filaments of bacterial cytoskeleton and, 483
Intermonomer cross talk

transmembrane traffic in cytochrome $b_6 f$ complex and, 780
Inversion
site-specific recombination and, 567, 569, 583
Invertases
site-specific recombination and, 596–98
Iron-sulfur clusters
NADH:quinone oxidoreductase (complex I) and, 69–87
Irreversible inhibitors
tyrphostins and other tyrosine kinase inhibitors, 100–1
Isocitrate dehydrogenase
cold-adapted enzymes and, 406–7, 409
obesity-related derangements in metabolic regulation and, 389
Isodesmic assembly
dynamic filaments of bacterial cytoskeleton and, 472–73
Isoprenoids
mammalian peroxisomes and, 314–15
3-Isopropylmalate dehydrogenase
cold-adapted enzymes and, 417, 426
Isoquinolines
tyrphostins and other tyrosine kinase inhibitors, 97

J

Jak inhibitors
tyrphostins and other tyrosine kinase inhibitors, 104–5
Jasplakinolide
animal cytokinesis and, 557
JIP proteins
axonal transport and Alzheimer's disease, 612, 617–18
"Jumping"
dynamic filaments of bacterial cytoskeleton and, 485

K

K antigen
capsular polysaccharides in *E. coli* and, 40–41, 47
Kinesins
animal cytokinesis and, 547, 555
axonal transport and Alzheimer's disease, 609–11, 614, 617–18, 620–21
Kinetics
asparagine synthetase chemotherapy and, 633–34
cold-adapted enzymes and, 406–7, 411–12
mitochondrial ADP/ATP carrier and, 733–34
Klebsiella spp.
capsular polysaccharides in *E. coli* and, 45, 47
NADH:quinone oxidoreductase (complex I) and, 84
Klenow fragment
history of research, 12
K_{LPS}
capsular polysaccharides in *E. coli* and, 49
Kluyveromyces lactis
break-induced replication and recombinational telomere elongation in yeast, 112, 116, 119, 121–23, 125, 127–30, 132
K pathway
proton transfer through respiratory complexes and, 168–70, 176–79
kps genes
capsular polysaccharides in *E. coli* and, 53–61

L

Lability
cold-adapted enzymes and, 403–28
Lactobacillus leischmanii
ribonucleotide reductases and, 684–87, 692
Lactococcus lactis
ribonucleotide reductases and, 684, 693, 698
lacZ gene
signaling pathways in skeletal muscle remodeling and, 24
Laminin
death-associated protein kinases and, 203
Lateral interaction
dynamic filaments of bacterial cytoskeleton and, 470
Lavendustin
tyrphostins and other tyrosine kinase inhibitors, 96
Lehman IR, 1–16
Leukemia
asparagine synthetase chemotherapy and, 629–49
tyrphostins and other tyrosine kinase inhibitors, 97–99
lipAB genes
capsular polysaccharides in *E. coli* and, 60
Lipase B
cold-adapted enzymes and, 415–16
Lipid metabolism
obesity-related derangements in metabolic regulation and, 367–94

Lipid rafts
membrane proteins and, 711
Lipopolysaccharide (LPS)
capsular polysaccharides in *E. coli* and, 42–44, 49, 56
Liver
obesity-related derangements in metabolic regulation and, 367–68, 370–74
Liver alcohol dehydrogenase
protein motion and catalysis, 519–20, 530–35
LKB1-dependent signaling pathways
activation, 146–49
AMP-activated protein kinases, 146–49
BRSK kinases, 154–56
cancer, 151–52
cell polarity, 154–56
conclusions, 157
future research, 158
introduction, 138–39
LKB1:STRAD:MO25 complex, 144–46
MARK kinases, 154–56
master upstream kinase, 152–54
perspectives, 157
Peutz-Jeghers syndrome, 151–52
posttranslational modifications, 143–44
pseudokinases, 146
regulation, 154–56
summary points, 158
tumor suppressor, 139–42
Local flexibility
cold-adapted enzymes and, 418–19
Longitudinal interaction
dynamic filaments of bacterial cytoskeleton and, 472
loxP gene
site-specific recombination and, 582
Lysine
gene expression regulation and chromatin modifications, 248–58

M

Malate dehydrogenase
cold-adapted enzymes and, 409, 420–21, 424, 426
Mammalian target of rapamycin (mTOR)
LKB1-dependent signaling pathways and, 149–52
signaling pathways in skeletal muscle remodeling and, 27–28
mar1-1 gene
sirtuins and, 437
MARK kinases
LKB1-dependent signaling pathways and, 154–56
Mastigocladus laminosus
transmembrane traffic in cytochrome b_6f complex and, 769–72, 774–75, 777–79, 783–86
MAT genes
sirtuins and, 436–37
MCF motif
mitochondrial ADP/ATP carrier and, 722–24
MEF2 genes
signaling pathways in skeletal muscle remodeling and, 19, 23–25
Meiosis
chromosome and plasmid segregation, 211, 220–22
Membrane arm
NADH:quinone oxidoreductase (complex I) and, 81
Membrane proteins
dynamics, 709–10
environment, 710–11
introduction, 708
mitochondrial ADP/ATP carrier and, 713–37
structure, 708–9
Membrane trafficking
capsular polysaccharides in *E. coli* and, 39
MEN/SIN proteins
animal cytokinesis and, 560
MEN1 gene
gene expression regulation and chromatin modifications, 253
Metabolism
history of research, 3
mammalian peroxisomes and, 295–325
obesity-related derangements in metabolic regulation and, 367–94
signaling pathways in skeletal muscle remodeling and, 19, 21
sirtuins and, 435, 438, 440, 442–44
Metal inhibition
proton transfer through respiratory complexes and, 176–77
Metalloproteases
cold-adapted enzymes and, 420–21, 424
Metalloproteinases
axonal transport and Alzheimer's disease, 616
Metazoans
sirtuins and, 437–45
Metformin
LKB1-dependent signaling pathways and, 151–52

Methanococcoides burtonii
cold-adapted enzymes and, 409, 411
Methanococcus jannaschii
dynamic filaments of bacterial cytoskeleton and, 470–71
Methanosarcina spp.
cold-adapted enzymes and, 406, 409, 411
NADH:quinone oxidoreductase (complex I) and, 77–78
Methylation
gene expression regulation and chromatin modifications, 243, 245–56, 259–63
Methyltransferases
histone
gene expression regulation and chromatin modifications, 256–58
MFP proteins
capsular polysaccharides in *E. coli* and, 61
Mg^{2+}
history of research, 5–7
Micrococcus luteus
capsular polysaccharides in *E. coli* and, 57
Microgravity
signaling pathways in skeletal muscle remodeling and, 19
Microtubule affinity-regulating kinase
LKB1-dependent signaling pathways and, 152
Microtubules
animal cytokinesis and, 543–61
axonal transport and Alzheimer's disease, 609–12, 619–20
Midpoint potential
NADH:quinone oxidoreductase (complex I) and, 82, 85–86
Mimicry
tyrphostins and other tyrosine kinase inhibitors, 99
Mitochondria
break-induced replication and recombinational telomere elongation in yeast, 130
death-associated protein kinases and, 205
NADH:quinone oxidoreductase (complex I) and, 69–87
obesity-related derangements in metabolic regulation and, 367, 382–85
proton transfer through respiratory complexes and, 166
ribonucleotide reductases and, 699–700
Mitochondrial ADP/ATP carrier
ATP binding from matrix, 731
brief history, 715–17
carboxyatractyloside, 722
cardiolipins, 736
cavity, 717–22
conclusions, 736–37
conformational changes, 732–34
conserved residues, 728
deviation, 727–28
dimerization, 734–35
functional unit, 734–35
future research, 737
human disease, 715
hypotheses, 736–37
IMS-binding sites, 730–31
introduction, 714–15
kinetics, 733–34
lipids, 726
MCF motif, 722–24
nucleotide attraction and binding, 728–31
oligomerization, 734–35
open questions, 736–37
pseudo-threefold symmetry, 727–28
signature, 725–26
structure analysis, 717–22, 731
summary points, 737
transport mechanism, 732–34
Mitochondrial carrier family (MCF)
mitochondrial ADP/ATP carrier and, 713–37
Mitogen-activated protein kinases (MAPKs)
death-associated protein kinases and, 197
eukaryotic signaling circuits and, 662–63
Mitosis
chromosome and plasmid segregation, 211, 218, 231–32
MLL genes
gene expression regulation and chromatin modifications, 251–53
MO25 gene
LKB1-dependent signaling pathways and, 144–46
Modularity
eukaryotic signaling circuits and, 655, 657–59, 664–69, 674–75
NADH:quinone oxidoreductase (complex I) and, 75–79
Molecular dynamics (MD) simulations
asparagine synthetase chemotherapy and, 641
proton transfer through respiratory complexes and, 167, 172, 178–79
MOLT-4 cells
asparagine synthetase chemotherapy and, 638, 648
Monoubiquitination

gene expression regulation and chromatin modifications, 259–60
Moritella profunda
cold-adapted enzymes and, 413
Motor proteins
axonal transport and Alzheimer's disease, 607–21
MPA proteins
capsular polysaccharides in *E. coli* and, 51, 61
MreB protein
dynamic filaments of bacterial cytoskeleton and, 467, 479–82
mrp genes
NADH:quinone oxidoreductase (complex I) and, 79
mTbB gene
mammalian peroxisomes and, 321
mTOR gene
LKB1-dependent signaling pathways and, 149–52
signaling pathways in skeletal muscle remodeling and, 27–28
mukB gene
chromosome and plasmid segregation, 223
Multimerization
sirtuins and, 459–60
telomerase reverse transcriptase and, 505–7
Mupirocin
asparagine synthetase chemotherapy and, 642, 644
MuRF gene
signaling pathways in skeletal muscle remodeling and, 31
Muscle
obesity-related derangements in metabolic regulation and, 367, 374–85
signaling pathways in skeletal muscle remodeling and, 19–33
Muscular dystrophy
signaling pathways in skeletal muscle remodeling and, 28–29
Mus musculus
NADH:quinone oxidoreductase (complex I) and, 73
sirtuins and, 439
Mycobacterium tuberculosis
ribonucleotide reductases and, 693
site-specific recombination and, 583
Myocyte enhancer factor-2 (MEF2)
signaling pathways in skeletal muscle remodeling and, 19, 23–25
Myofibers
signaling pathways in skeletal muscle remodeling and, 19–33
Myoglobin
signaling pathways in skeletal muscle remodeling and, 24
Myosin
animal cytokinesis and, 547, 552, 555–56, 559
death-associated protein kinases and, 191, 195, 202–5
signaling pathways in skeletal muscle remodeling and, 21, 24–25

N

Na^+/H^+ antiporters
NADH:quinone oxidoreductase (complex I) and, 69, 78–79
NAD^+
sirtuins and, 435, 441–55, 457–61
NADH:quinone oxidoreductase (complex I)
accessory subunits, 73–75
central subunits, 71–73
function, 81–86
future research, 87
inhibitors, 82–83
introduction, 70
medical aspects, 86
membrane arm, 81
modular design, 75–79
N module, 76–77
peripheral arm, 79–81
P module, 78–79
proton-pumping mechanism, 84–86
Q module, 78
quinine-reducing catalytic core, 83–84
redox centers, 82–83
structure, 80–81
substrates, 82–83
subunits, 70–71
summary points, 86–87
NADP-dependent isocitrate dehydrogenase
obesity-related derangements in metabolic regulation and, 389
Nanomolecular inhibitor
asparagine synthetase chemotherapy and, 643–46, 648
Neisseria meningitidis
capsular polysaccharides in *E. coli* and, 44, 59
Nephila edulis
amyloid structures and protein misfolding, 340
neu genes

capsular polysaccharides in *E. coli* and, 55–57, 59–61
Neurofibrillary tangles
axonal transport and Alzheimer's disease, 615–16, 618–19, 621
Neurons
axonal transport and Alzheimer's disease, 607–21
signaling pathways in skeletal muscle remodeling and, 22
Neurospora crassa
amyloid structures and protein misfolding, 340
history of research, 4
NADH:quinone oxidoreductase (complex I) and, 75, 86
NFB42 neuron-specific protein
history of research, 15
Nicastrin
axonal transport and Alzheimer's disease, 615, 617
Nicotinamide
sirtuins and, 452–54
Nitrogen metabolism
mammalian peroxisomes and, 301–2
N module
NADH:quinone oxidoreductase (complex I) and, 76–77
Nodes
transcriptional
eukaryotic signaling circuits and, 657–58
Nonchromosomal genetic elements
amyloid structures and protein misfolding, 339–41
Nonyl-4-hydroxyquinolone *N*-oxide (NQNO)
transmembrane traffic in cytochrome b_6f complex and, 782–83
NQR protein
NADH:quinone oxidoreductase (complex I) and, 70
nrd genes
ribonucleotide reductases and, 683–84, 692–93
N-terminal domains
Hsp90 molecular chaperone and, 273–74
Nuclear factor of activated T cells (NFAT)
signaling pathways in skeletal muscle remodeling and, 25–26
Nuclear magnetic resonance (NMR)
amyloid structures and protein misfolding, 341–43, 346
sirtuins and, 448
Nucleases
history of research, 8–9
telomerase reverse transcriptase and, 504–5
Nucleated growth mechanism
amyloid structures and protein misfolding, 347
Nucleoids
chromosome and plasmid segregation, 213, 216
Nucleophilic attack
sirtuins and, 449–50
Nucleosomes
gene expression regulation and chromatin modifications, 243, 245
Nucleotide addition processivity
telomerase reverse transcriptase and, 501
Nucleotide binding
Hsp90 molecular chaperone and, 273–74
mitochondrial ADP/ATP carrier and, 728–31
Nucleotide exchange
dynamic filaments of bacterial cytoskeleton and, 473–74
Nucleotide hydrolysis
dynamic filaments of bacterial cytoskeleton and, 476
Nucleotide transport
mitochondrial ADP/ATP carrier and, 713–37
Nutrient-sensing reponse element (NSRE)
asparagine synthetase chemotherapy and, 636–37
N-WASP protein
eukaryotic signaling circuits and, 665

O

O antigens
capsular polysaccharides in *E. coli* and, 47–49, 56
Obesity
signaling pathways in skeletal muscle remodeling and, 29–31
Obesity-related derangements
in metabolic regulation
adipose tissue, 370–74
conclusions, 393–94
CPT-malonyl-CoA system, 375–76
fuel homeostasis, 375
future research, 394
insulin resistance, 376–78
introduction, 368–70
liver, 370–74
mitochondria, 382–85
pancreatic islets, 385–93
PPARγ coactivator 1, 375
regulation, 375–76

responder peripheral tissues, 374–93
skeletal muscle, 374–85
substrate utilization, 378–82
summary points, 394
transcriptional reprogramming, 374–75
Okazaki fragments
history of research, 12
Oligomerization
amyloid structures and protein misfolding, 333, 347–51
capsular polysaccharides in *E. coli* and, 52
mitochondrial ADP/ATP carrier and, 713, 734–35
OMA proteins
capsular polysaccharides in *E. coli* and, 52–53, 58, 61
ops genes
capsular polysaccharides in *E. coli* and, 46
oriC replication irigin
chromosome and plasmid segregation, 213, 216, 230, 233
Ornithine carbamoyltransferase
cold-adapted enzymes and, 410, 417
Oryza sativa
NADH:quinone oxidoreductase (complex I) and, 73
Oscillators
chromosome and plasmid segregation, 233
OSI-774
tyrphostins and other tyrosine kinase inhibitors, 99
Oxidation
mammalian peroxisomes and, 295–325
transmembrane traffic in cytochrome b_6f complex and, 775–81
Oxidative phosphorylation
proton transfer through respiratory complexes and, 181–82
Oxygen labeling
sirtuins and, 448
Oxygen metabolism
mammalian peroxisomes and, 301–2

P

p23/Sba1 protein
Hsp90 molecular chaperone and, 286–89
p53R2 gene
ribonucleotide reductases and, 684
p150^{Glued} gene
axonal transport and Alzheimer's disease, 613
Paenibacillus polymyxa
cold-adapted enzymes and, 416
PAHX/PHYH gene
mammalian peroxisomes and, 318
Pairing
chromosome and plasmid segregation, 220–22
Pancreas
obesity-related derangements in metabolic regulation and, 367–68, 385–93
Pandalus borealis
cold-adapted enzymes and, 406, 411
par genes
chromosome and plasmid segregation, 211, 226–30, 233, 235
dynamic filaments of bacterial cytoskeleton and, 467, 477–79
LKB1-dependent signaling pathways and, 154
Paracoccus denitrificans
NADH:quinone oxidoreductase (complex I) and, 72, 76, 80
proton transfer through respiratory complexes and, 168, 180
Parkinson's disease
amyloid structures and protein misfolding, 333, 336–37, 356
Partial unfolding
amyloid structures and protein misfolding, 349
Partitioning
chromosome and plasmid segregation, 211–12, 226–29, 231
sirtuins and, 453–54
Pasteurella multocida
capsular polysaccharides in *E. coli* and, 56
Pausing
axonal transport and Alzheimer's disease, 610
PCG1 protein
obesity-related derangements in metabolic regulation and, 375
PCP proteins
capsular polysaccharides in *E. coli* and, 49, 51
PDK1 interaction fragment (PIF)
eukaryotic signaling circuits and, 663
pds genes
chromosome and plasmid segregation, 218
Pentose phosphate pathway
mammalian peroxisomes and, 313
Pepsin
cold-adapted enzymes and, 420–21
Peripheral arm
NADH:quinone oxidoreductase (complex I) and, 79–81
Permeability
mammalian peroxisomes and, 319–20

Peroxisome proliferators-activated receptors (PPARs)
obesity-related derangements in metabolic regulation and, 374–75
signaling pathways in skeletal muscle remodeling and, 27
Peroxisomes
mammalian
ABC transporter, 322–24
amino acid catabolism, 313
cholesterol, 314–15
conclusions, 325
enzymes, 308–11, 314
ether phospholipids, 302–5
fatty acid α-oxidation, 311–12
fatty acid β-oxidation, 305–11
genetic diseases, 315–21
glyoxylates, 312–13
human disorders, 315–18
intraperoxisomal pH, 322
introduction, 296–97
isoprenoids, 314–15
membrane transport, 306–8
metabolic pathways, 302–15
metabolite transport, 319, 322–25
mouse models, 316, 319–21
oxygen metabolism, 301–2
pentose phosphate pathway, 313
permeability, 319–20
peroxisomal proteins, 297–300
peroxisomal transporters, 325
polyamine oxidation, 313–14
reactive nitrogen species, 301–2
reactive oxygen species, 301–2
substrate specificity, 306
Peutz-Jeghers syndrome
LKB1-dependent signaling pathways and, 137–40, 145, 151–55, 157
PEX genes
mammalian peroxisomes and, 316–17, 320
pH
mammalian peroxisomes and, 322
Phage integrases
site-specific recombination and, 598–99
Phenformin
LKB1-dependent signaling pathways and, 147
Phosmidosine
asparagine synthetase chemotherapy and, 644
Phosphatases
death-associated protein kinases and, 206
Phosphate
asparagine synthetase chemotherapy and, 643
history of research, 3
Phosphoglycerate kinase
cold-adapted enzymes and, 410, 415, 424
3-Phosphoinositide-dependent kinase-1 (PDK1)
eukaryotic signaling circuits and, 663
Phosphorylation
death-associated protein kinases and, 191–93, 195–97, 201–6
gene expression regulation and chromatin modifications, 243
proton transfer through respiratory complexes and, 181–82
tyrphostins and other tyrosine kinase inhibitors, 93–105
Photosynthesis
transmembrane traffic in cytochrome b_6f complex and, 769
Phototransduction
rhodopsin and, 743–62
Pichia philodendra
break-induced replication and recombinational telomere elongation in yeast, 130
Piericidin A
NADH:quinone oxidoreductase (complex I) and, 83
Pigment molecules
transmembrane traffic in cytochrome b_6f complex and, 786–87
Plasmalogens
mammalian peroxisomes and, 295
Plasma membrane
NADH:quinone oxidoreductase (complex I) and, 69–87
Plasmid segregation
chromosome segregation and, 211
Plasmodium falciparum
ribonucleotide reductases and, 684
telomerase reverse transcriptase and, 496–98
Plastoquinones
transmembrane traffic in cytochrome b_6f complex and, 769, 784
Platelet-derived growth factor receptor (PDGFR)
tyrphostins and other tyrosine kinase inhibitors, 103–4
P module
NADH:quinone oxidoreductase (complex I) and, 78–79
Podospera anserina
amyloid structures and protein misfolding, 340
pol A gene
history of research, 11–12

Polyamine oxidation
mammalian peroxisomes and, 313–14
polycomb genes
gene expression regulation and chromatin modifications, 248, 254
Polymerases
chromosome and plasmid segregation, 218, 493
Polymerization
capsular polysaccharides in *E. coli* and, 50–51
Polymorphism
amyloid structures and protein misfolding, 345–46
Polyphenols
sirtuins and, 460–61
Position-effect variegation (PEV)
gene expression regulation and chromatin modifications, 248
Posttranslational modification
gene expression regulation and chromatin modifications, 245–46
LKB1-dependent signaling pathways and, 143–44
PP1
tyrphostins and other tyrosine kinase inhibitors, 98
PPA α-amylase
cold-adapted enzymes and, 406, 410–11, 413, 425
PRC1 gene
gene expression regulation and chromatin modifications, 254
Prednisone
asparagine synthetase chemotherapy and, 631
Presenilins
axonal transport and Alzheimer's disease, 612, 615–19
Prions
amyloid structures and protein misfolding, 333, 339–40, 354
PRMT1 gene
gene expression regulation and chromatin modifications, 258
Processivity
telomerase reverse transcriptase and, 493–512
Profilin
animal cytokinesis and, 547
Programmed cell death
death-associated protein kinases and, 189–207
Prosthecobacter dejongeii
dynamic filaments of bacterial cytoskeleton and, 471, 475
Prosthetic groups
transmembrane traffic in cytochrome b_6f complex and, 771–73
Proteases
chromosome and plasmid segregation, 220
Protein aggregation
amyloid structures and protein misfolding, 333–60
Protein conformational motions
enzyme catalysis and
conclusions, 535–38
conformational changes, 526–28, 532–33
dihydrofolate reductase, 520–30
future research, 538
introduction, 520
liver alcohol dehydrogenase, 530–35
mutagenesis, 522–33
summary points, 538
theoretical studies of motion, 528–35
Protein kinases
death-associated protein kinases and, 189–207
eukaryotic signaling circuits and, 662–64, 669
LKB1-dependent signaling pathways and, 137, 139, 144, 146–52, 156–57
signaling pathways in skeletal muscle remodeling and, 19, 26–27
Protein radicals
ribonucleotide reductases and, 681, 690–92
Protein tyrosine kinases (PTKs)
tyrphostins and other tyrosine kinase inhibitors, 93–105
Protein unfolding
cold-adapted enzymes and, 410–11
Protelomerases
site-specific recombination and, 582
Proteomics
animal cytokinesis and, 543
asparagine synthetase chemotherapy and, 647, 649
gene expression regulation and chromatin modifications, 259
Protofibrils
amyloid structures and protein misfolding, 347–49
Proton pumping
NADH:quinone oxidoreductase (complex I) and, 69–87
proton transfer through respiratory complexes and, 170–74
Proton transfer
through respiratory complexes
active site, 171–74

computational insights, 178–80
coupling, 171
CuA, 171
cytochrome *c* oxidase, 168–80
D pathway, 177, 179
electron transfer, 171–74
electron transfer-driven pump, 168–80
electrostatic calculations, 180
exit/backflow pathway, 178
experimental insights, 174–78
future research, 183
heme *a*, 171
introduction, 166–67
K pathway, 177–79
long-range proton movement through proteins, 167–68
metal inhibition of proton uptake, 176–77
mutants affecting proton movement, 177–78
oxidative phosphorylation, 181–82
proton exit simulations, 179–80
proton motive complexes, 181–82
proton pathways, 168–70
proton pumping, 170–74
subunit III, 174–76
summary points, 182–83
water and proton dynamics, 178–79
Pseudoalteromonas haloplanktis
cold-adapted enzymes and, 405–7, 411, 413–14, 420–21, 423
Pseudokinases
LKB1-dependent signaling pathways and, 144–49
Pseudomonas spp.
chromosome and plasmid segregation, 230
ribonucleotide reductases and, 693
Pseudo-threefold symmetry
mitochondrial ADP/ATP carrier and, 727–28
Psychrophiles
cold-adapted enzymes and, 403
Purse-string model
animal cytokinesis and, 555
Pyrococcus furiosus
cold-adapted enzymes and, 417
dynamic filaments of bacterial cytoskeleton and, 484
Pyrophosphate
inorganic
asparagine synthetase chemotherapy and, 633–34
Pyruvate cycling
obesity-related derangements in metabolic regulation and, 367, 386–88, 392–93

Q

Q module
NADH:quinone oxidoreductase (complex I) and, 78
QN 012380
tyrphostins and other tyrosine kinase inhibitors, 98
Q_P pocket
transmembrane traffic in cytochrome b_6f complex and, 778–79
Quercetin
tyrphostins and other tyrosine kinase inhibitors, 96
Quinazolines
tyrphostins and other tyrosine kinase inhibitors, 97
Quinolines
tyrphostins and other tyrosine kinase inhibitors, 97
Quinols
transmembrane traffic in cytochrome b_6f complex and, 769, 775–81
Quinones
transmembrane traffic in cytochrome b_6f complex and, 769, 781–86
Quinoxalines
tyrphostins and other tyrosine kinase inhibitors, 97

R

rad51 gene
break-induced replication and recombinational telomere elongation in yeast, 111, 114–15, 120
Random synapsis
site-specific recombination and, 578–79
Rapamycin
LKB1-dependent signaling pathways and, 149–52
signaling pathways in skeletal muscle remodeling and, 27–28
Ras/mitogen-activated protein kinase
signaling pathways in skeletal muscle remodeling and, 27
Reactive nitrogen species (RNS)
mammalian peroxisomes and, 301–2
Reactive oxygen species (ROS)
mammalian peroxisomes and, 295, 301–2

obesity-related derangements in metabolic regulation and, 384–85
proton transfer through respiratory complexes and, 166
recA gene
history of research, 13–14
Recombinases
break-induced replication and recombinational telomere elongation in yeast, 111, 114–15, 120
chromosome and plasmid segregation, 233–35
Recombination
break-induced replication and recombinational telomere elongation in yeast, 111–32
eukaryotic signaling circuits and, 655, 665
site-specific recombination and, 567–600
Redox mechanism
NADH:quinone oxidoreductase (complex I) and, 69–87
Refsum disease
mammalian peroxisomes and, 316, 318–19
Regulation
axonal transport and Alzheimer's disease, 611–12
death-associated protein kinases and, 192–93, 196–97
eukaryotic signaling circuits and, 657, 659, 663, 665, 669–71, 674–75
gene expression regulation and chromatin modifications, 243
LKB1-dependent signaling pathways and, 154–56
obesity-related derangements in metabolic regulation and, 367–94
ribonucleotide reductases and, 681–99
site-specific recombination and, 567, 569, 578, 592–600
Rejoining
strand
site-specific recombination and, 567, 570–72, 584–86
Religation
site-specific recombination and, 567
Remodeling
signaling pathways in skeletal muscle remodeling and, 19–33
Repeat addition processivity
telomerase reverse transcriptase and, 502
Replication
break-induced replication and recombinational telomere elongation in yeast, 111–32
chromosome and plasmid segregation, 213–15, 217
Rep proteins
chromosome and plasmid segregation, 211, 230–31
Resolution
site-specific recombination and, 583
Resolvases
site-specific recombination and, 567, 570, 582–85, 592–96
Respiratory complexes
proton transfer through, 165–82
Restenosis
tyrphostins and other tyrosine kinase inhibitors, 93, 104
Restriction endonucleases
history of research, 9
Resveratrol
sirtuins and, 460–61
Retina
rhodopsin and, 743–62
Retrograde transport
axonal transport and Alzheimer's disease, 610–11
Reverse transcriptase
telomerase reverse transcriptase and, 493–512
Reversible inhibitors
tyrphostins and other tyrosine kinase inhibitors, 99–100
Rho-activated protein kinase (ROCK)
death-associated protein kinases and, 201–2, 206
Rhodobacter sphaeroides
dynamic filaments of bacterial cytoskeleton and, 481
NADH:quinone oxidoreductase (complex I) and, 76
proton transfer through respiratory complexes and, 168–69, 173, 176, 178–79
transmembrane traffic in cytochrome b_6f complex and, 781
Rhodomonas salina
NADH:quinone oxidoreductase (complex I) and, 73
Rhodopsin
background, 744–45
chromophore, 753–54
conclusions, 760–61
dimerization, 757–59
discovery, 747
future research, 762
G protein interaction, 758–60

overview, 745–48
perspectives, 760–61
scope of review, 744–45
structure, 748–57
summary points, 761
Rhodospirillum rubrum
NADH:quinone oxidoreductase (complex I) and, 78
Rhodothermus marinus
proton transfer through respiratory complexes and, 180
Ribonucleoproteins (RNPs)
telomerase reverse transcriptase and, 493, 510
Ribonucleotide reductases (RNRs)
active site, 687–90, 698–99
allosteric regulation, 694–99
ATP cone, 698–99
bacteria, 692–93
catalytic mechanism, 687–90
Chlamydia trachomatis, 685–87
class I, 682–83
class II, 683
class III, 683
classification, 682–83
dNTP pools, 699–700
Euglena gracilis, 684
evolution, 700–1
future research, 701
gene organization, 683–84
gene regulation, 692–94
introduction, 682
mammalian cells, 693
mitochondria, 699–700
occurence, 683–84
p53R2, 684
radical storage and transfer, 690–92
special enzymes, 684–85
specificity site, 694–98
structure, 685–90
summary points, 701
yeast, 684, 693–94, 699
Ribosomal DNA (rDNA) genes
sirtuins and, 454
Ribosylation
sirtuins and, 439
Rieske ISP
transmembrane traffic in cytochrome b_6f complex and, 780–81
RNA binding
telomerase reverse transcriptase and, 502–3
RNA interference (RNAi)
animal cytokinesis and, 543–46, 548, 552, 554, 556
sirtuins and, 438, 440
Rnq1 protein
amyloid structures and protein misfolding, 340
RNR genes
ribonucleotide reductases and, 684, 694
Rod outer segments
rhodopsin and, 743, 745–46, 758
"Roll and spread" mechanism
break-induced replication and recombinational telomere elongation in yeast, 111, 123–28
Rolling circles
break-induced replication and recombinational telomere elongation in yeast, 111, 127, 132
Rolliniastain-1
NADH:quinone oxidoreductase (complex I) and, 83
Rotenone
NADH:quinone oxidoreductase (complex I) and, 83
Rrm2b gene
ribonucleotide reductases and, 684

S

Saccharomyces cerevisiae
amyloid structures and protein misfolding, 339–40, 346
break-induced replication and recombinational telomere elongation in yeast, 112, 116–23, 125, 127–28, 130
chromosome and plasmid segregation, 217–18, 230
eukaryotic signaling circuits and, 662
gene expression regulation and chromatin modifications, 251, 253, 259
mammalian peroxisomes and, 323–24
NADH:quinone oxidoreductase (complex I) and, 70, 73
sirtuins and, 436, 438–40
telomerase reverse transcriptase and, 496–97, 502, 504
Salmonella spp.
capsular polysaccharides in *E. coli* and, 47–49
ribonucleotide reductases and, 685–86, 694, 697
sirtuins and, 439, 445
site-specific recombination and, 568–69, 596
Salmo salar
cold-adapted enzymes and, 420–21
Salt bridges

cold-adapted enzymes and, 410, 412, 423, 425
Salt-inducible kinase
LKB1-dependent signaling pathways and, 152
Sba1 protein
Hsp90 molecular chaperone and, 286–89
Scaffolds
eukaryotic signaling circuits and, 658–59, 669–70, 672
Scanning transmission electron microscopy (STEM)
amyloid structures and protein misfolding, 341, 343
Schizosaccharomyces pombe
break-induced replication and recombinational telomere elongation in yeast, 116, 129–30
chromosome and plasmid segregation, 217
eukaryotic signaling circuits and, 662
gene expression regulation and chromatin modifications, 248–49
sirtuins and, 438–40
SCL25 proteins
mitochondrial ADP/ATP carrier and, 713–37
Scopulariopsis spp.
cold-adapted enzymes and, 407
scp genes
chromosome and plasmid segregation, 224
mammalian peroxisomes and, 321
Secondary structure
amyloid structures and protein misfolding, 353
cold-adapted enzymes and, 425–26
Secretins
capsular polysaccharides in *E. coli* and, 52
Self-assembly
in vitro
dynamic filaments of bacterial cytoskeleton and, 469–70, 475–76
Semiquinones
NADH:quinone oxidoreductase (complex I) and, 69–87
proton transfer through respiratory complexes and, 166
Senile plaques
axonal transport and Alzheimer's disease, 615–16, 618–20
Separase
chromosome and plasmid segregation, 220
Septins
animal cytokinesis and, 559
serA gene
capsular polysaccharides in *E. coli* and, 53
Serine recombinases
site-specific recombination and, 567, 570–72, 582–600
Serine/threonine kinases
death-associated protein kinases and, 189–207
Serratia marcescens
cold-adapted enzymes and, 406–7
Set2 gene
gene expression regulation and chromatin modifications, 253–54
SH2/SH3 homology
eukaryotic signaling circuits and, 664
Signaling
animal cytokinesis and, 551
death-associated protein kinases and, 189, 204–7
rhodopsin and, 743–62
sirtuins and, 435
skeletal muscle remodeling and, 19–33
tyrphostins and other tyrosine kinase inhibitors, 93–105
Signaling circuits
eukaryotic
adaptors, 669–70, 672
catalysis, 664–69
classical regulatory proteins, 657, 659
conclusions, 674–75
connecting transcriptional nodes, 657–58
connectivity, 664–69
distributed surfaces, 661–62
docking interactions, 660–64, 672
domain discrimination, 665, 667–69
evolvability of new circuitry, 656–60, 674–75
functional modularity, 657–58
future research, 676
genetically-independent wiring elements, 669–70, 672
introduction, 656
kinases, 662–64
modularity, 674–75
modular recognition domains, 664–69
recognition beyond active site, 660–64
recombination, 665
regulation, 663, 665, 669–71, 674–75
scaffolds, 669–70, 672
signaling pathways, 671–74
signaling switches, 672, 674
structural modularity, 657–59
summary points, 675–76
synthetic biology, 671–74
Signal transduction therapy

tyrphostins and other tyrosine kinase inhibitors, 95–96
Simulated annealing
asparagine synthetase chemotherapy and, 641
Single-particle analysis
NADH:quinone oxidoreductase (complex I) and, 79
Sin paradigm
site-specific recombination and, 595–96
Sir2 genes
sirtuins and, 437–45, 448–49
Sirtinol
sirtuins and, 461
Sirtuins
acetylation, 455, 457
activators, 454, 460–61
ADP-ribosyl transferase, 445–46
ADPR-peptidyl-imidate mechanism, 450–52
aging, 444–45
bacteria, 437–45
base exchange, 447–48
binding, 455, 457–58

PPAR coactivator-1α, 27
protein kinase C, 26–27
protein kinase D, 26–27
Ras/mitogen-activated protein kinase, 27
summary points, 33
Slow-twitch myofibers
signaling pathways in skeletal muscle remodeling and, 21, 25
Small molecule modulators
sirtuins and, 460–61
smc genes
chromosome and plasmid segregation, 223–25
SNARE proteins
animal cytokinesis and, 559–60
death-associated protein kinases and, 204
Solid-state nuclear magnetic resonance (SSNMR)
amyloid structures and protein misfolding, 341–44, 346
Solvent labeling patterns
sirtuins and, 446–48
Spacer complementarity
site-specific recombination and, 578–79
Specificity
mammalian peroxisomes and, 306
ribonucleotide reductases and, 681, 694–98
site-specific recombination and, 592–94, 596–99
Splitomicins
sirtuins and, 461
spoOJ gene
chromosome and plasmid segregation, 230
Srpk3 gene
signaling pathways in skeletal muscle remodeling and, 24–25
Stability
cold-adapted enzymes and, 403, 410–17
Stalling
axonal transport and Alzheimer's disease, 610
Static flexibility
cold-adapted enzymes and, 417
STB genes
chromosome and plasmid segregation, 211, 227, 230–32, 236
Stembody
animal cytokinesis and, 554
Steroids
signaling pathways in skeletal muscle remodeling and, 32
STI-571
tyrphostins and other tyrosine kinase inhibitors, 97–99
STRAD genes
LKB1-dependent signaling pathways and, 144–46
Streptococcus pneumoniae
capsular polysaccharides in *E. coli* and, 56
dynamic filaments of bacterial cytoskeleton and, 482
Streptomyces coelicolor
amyloid structures and protein misfolding, 339–40
chromosome and plasmid segregation, 230
ribonucleotide reductases and, 683–84, 693
Streptomyces spp.
cold-adapted enzymes and, 407
site-specific recombination and, 569
Streptomycin
history of research, 5
Structural adaptation
cold-adapted enzymes and, 415, 419–27
Structural modularity
eukaryotic signaling circuits and, 657–58
ribonucleotide reductases and, 681
Subtilisin
cold-adapted enzymes and, 406, 415–16, 420–21, 424, 426–27
"Suicide inactivation" process
proton transfer through respiratory complexes and, 175
Sulfobetaine
cold-adapted enzymes and, 413
Sulfolobus solfataricus
amyloid structures and protein misfolding, 348
sirtuins and, 439

Sulfonamide derivatives
asparagine synthetase chemotherapy and, 641–43
Sulfoximine
asparagine synthetase chemotherapy and, 643, 645–47, 649
Sumoylation
gene expression regulation and chromatin modifications, 243
Sup35 protein
amyloid structures and protein misfolding, 340
Surface loops
cold-adapted enzymes and, 426
Survivin
animal cytokinesis and, 548
SUV genes
gene expression regulation and chromatin modifications, 248–49
Switches
synthetic
eukaryotic signaling circuits and, 672, 674
Synapsis
site-specific recombination and, 574–79, 586–89, 598–99
Synechococcus spp.
transmembrane traffic in cytochrome b_6f complex and, 775, 779
Synechocystis spp.
NADH:quinone oxidoreductase (complex I) and, 73
transmembrane traffic in cytochrome b_6f complex and, 775
Syntaxins
animal cytokinesis and, 547, 559
death-associated protein kinases and, 206
Synthetic biology
eukaryotic signaling circuits and, 671–74
Synuclein
axonal transport and Alzheimer's disease, 617

T

T2 phage
history of research, 3–4
Target-target recombination
death-associated protein kinases and, 189
site-specific recombination and, 599–600
tau protein
axonal transport and Alzheimer's disease, 617–20
T cells
signaling pathways in skeletal muscle remodeling and, 25–26
TDS-ring-out conformation
transmembrane traffic in cytochrome b_6f complex and, 779–80
TEL genes
sirtuins and, 454
Telomerase reverse transcriptase (TERT)
catalysis, 499–500
conclusions, 511–12
dimerization, 505–7
elongation, 500–1
evolution, 496–98
future research, 512
introduction, 494–95
multimerization, 505–7
nuclease, 504–5
nucleotide addition processivity, 501
processivity, 500–2
repeat addition processivity, 502
RNA binding, 502–3
structure, 496–500
summary points, 512
telomere maintenance, 509–11
template utilization, 503–4
TERT-associated proteins, 507–9
Telomerases
break-induced replication and recombinational telomere elongation in yeast, 111, 128–29, 131–32
Template utilization
telomerase reverse transcriptase and, 503–4
terC gene
chromosome and plasmid segregation, 213, 216, 234
Terminal palindromes
break-induced replication and recombinational telomere elongation in yeast, 130–31
5,6,7,8-Tetrahydrofolate (H_4F)
protein motion and catalysis, 520–21
Tetrahymena thermophila
telomerase reverse transcriptase and, 495–97, 500–6
Thermoactinomycetes vulgaris
cold-adapted enzymes and, 427
Thermodynamics
cold-adapted enzymes and, 403–28
Thermophiles
transmembrane traffic in cytochrome b_6f complex and, 769–72, 774–75, 777–79, 783–86
Thermoplasma acidophilum

ribonucleotide reductases and, 698
Thermotoga maritima
cold-adapted enzymes and, 413
dynamic filaments of bacterial cytoskeleton and, 477, 480
ribonucleotide reductases and, 686, 688, 691–92, 694, 696–97
Thermus thermophilus
amyloid structures and protein misfolding, 349
cold-adapted enzymes and, 417
NADH:quinone oxidoreductase (complex I) and, 72, 79–82
proton transfer through respiratory complexes and, 180
Thioflavin T
amyloid structures and protein misfolding, 336, 339, 348–50, 353
Tissue rejection
tyrphostins and other tyrosine kinase inhibitors, 93
Tn3/γδ paradigm
site-specific recombination and, 592–95
Topoisomerases
chromosome and plasmid segregation, 224–25, 233–35
"Topological filter"
site-specific recombination and, 592–96
TPR-domain cochaperones
Hsp90 molecular chaperone and, 281–83
Trafficking
capsular polysaccharides in *E. coli* and, 39
transmembrane traffic in cytochrome b_6f complex and, 769–87
Transcription
asparagine synthetase chemotherapy and, 635–37
eukaryotic signaling circuits and, 657–58
gene expression regulation and chromatin modifications, 243
obesity-related derangements in metabolic regulation and, 374–75
Transcriptional memory
gene expression regulation and chromatin modifications, 260–61
Transcription factors
signaling pathways in skeletal muscle remodeling and, 19, 23–25
trans-envelope assembly complex
capsular polysaccharides in *E. coli* and, 39, 52
Transforming growth factor (TGF)
death-associated protein kinases and, 194, 197, 206
Transgenes
signaling pathways in skeletal muscle remodeling and, 19, 24–25
Transition state mimicry
asparagine synthetase chemotherapy and, 645
Translocases
chromosome and plasmid segregation, 233–35
Translocation
capsular polysaccharides in *E. coli* and, 52–53
Transmembrane traffic
cytochrome b_6f complex and, 769–87
Transmission electron microscopy (TEM)
amyloid structures and protein misfolding, 336, 343, 346–47
Transport
axonal transport and Alzheimer's disease, 607–21
mammalian peroxisomes and, 306–8, 319, 322–25
mitochondrial ADP/ATP carrier and, 713, 732–34
Transposases
site-specific recombination and, 599–600
Transposition
site-specific recombination and, 569, 583
Transverse urea-gradient gel electrophoresis (TUG-GE)
cold-adapted enzymes and, 410, 418
Traumatic brain injury
axonal transport and Alzheimer's disease, 614
Triacylglycerol
obesity-related derangements in metabolic regulation and, 376–77, 390–91
Tricarboxylic acid (TCA) cycle
obesity-related derangements in metabolic regulation and, 380–82, 386–89, 394
Triosephosphate isomerase
cold-adapted enzymes and, 416, 420–21, 426
Troponin
signaling pathways in skeletal muscle remodeling and, 24
trx genes
gene expression regulation and chromatin modifications, 248
Trypanosoma brucei
mammalian peroxisomes and, 322
NADH:quinone oxidoreductase (complex I) and, 72
ribonucleotide reductases and, 698
sirtuins and, 439
Trypsin

cold-adapted enzymes and, 406, 411, 422, 424, 426
TSC2 gene
LKB1-dependent signaling pathways and, 149–51
Tuberous sclerosis
LKB1-dependent signaling pathways and, 149–51
Tubulin
animal cytokinesis and, 547
axonal transport and Alzheimer's disease, 619
dynamic filaments of bacterial cytoskeleton and, 467–76
sirtuins and, 438–39
Tumor necrosis factor (TNF)
death-associated protein kinases and, 194–95
Tumor suppressor gene
LKB1-dependent signaling pathways and, 139–42
Tunicamycin
death-associated protein kinases and, 206
twinstar gene
animal cytokinesis and, 557
Type 4 secretion systems
capsular polysaccharides in *E. coli* and, 53
Tyrosine kinase inhibitors
tyrphostins and other tyrosine kinase inhibitors, 93–105
Tyrosine recombinases
site-specific recombination and, 567, 570–82
Tyrphostins
other tyrosine kinase inhibitors and
ATP mimics, 99
Bcr-Abl kinase, 97–99
chronic myelogenous leukemia, 97–99
conclusions, 105
EGFR-directed tyrphostins in combination with other agents, 101
EGFR kinase inhibitors, 99–101
erlotinib, 100
gefitinib, 100
introduction, 94–95
irreversible inhibitors, 100–1
Jak-2 inhibitors, 104
Jak-3 inhibitors, 104–5
PDGFR, 103–4
PDGFR kinase inhibitors, 104
protein tyrosine kinases, 95–96
resistance, 98–100
restenosis, 104
reversible inhibitors, 99–100
signal transduction therapy, 95–96
STI-571, 98–99
structural considerations, 101–2
tyrphostins, 96–97
VEGF receptor tyrosine kinase inhibitors, 102–4

U

Ubiquinones
NADH:quinone oxidoreductase (complex I) and, 69–87
proton transfer through respiratory complexes and, 181
Ubiquitination
gene expression regulation and chromatin modifications, 243, 247, 254–56
UCP proteins
obesity-related derangements in metabolic regulation and, 375, 385, 391–92
UL9 protein
history of research, 15
Undecaprenylphosphate (und-P)
capsular polysaccharides in *E. coli* and, 47–48
Unfolded protein response (UPR)
asparagine synthetase chemotherapy and, 636–37
Unpairing
chromosome and plasmid segregation, 220–22
Unstructured aggregates
amyloid structures and protein misfolding, 348–49
Uracil-DNA glycosylase
cold-adapted enzymes and, 420–22, 424
Ure2 protein
amyloid structures and protein misfolding, 340

V

VAMP-8 protein
animal cytokinesis and, 559
van der Waals contacts
cold-adapted enzymes and, 408, 421
protein motion and catalysis, 525, 532, 534
VEGF receptor tyrosine kinase inhibitors
tyrphostins and other tyrosine kinase inhibitors, 102–3
Velocity
axonal transport and Alzheimer's disease, 610–11
Vibrio spp.
asparagine synthetase chemotherapy and, 634
cold-adapted enzymes and, 416, 420–21, 427
site-specific recombination and, 582

Vincristine
asparagine synthetase chemotherapy and, 632
Viral latency
history of research, 1, 14–15
Viscosity
cold-adapted enzymes and, 408
Visual pigments
rhodopsin and, 743–62
Vlcs gene
mammalian peroxisomes and, 323

W

Walker A cytoskeletal ATPase (WACA) proteins
dynamic filaments of bacterial cytoskeleton and, 482–86
wecA gene
capsular polysaccharides in *E. coli* and, 47
"Worse and random" segregation
chromosome and plasmid segregation, 229
wz genes
capsular polysaccharides in *E. coli* and, 45–54, 61

X

X-chromosome inactivation
gene expression regulation and chromatin modifications, 254–56
Xenopus laevis
animal cytokinesis and, 556–58
LKB1-dependent signaling pathways and, 143–44, 154
XerCD gene
chromosome and plasmid segregation, 234–35
site-specific recombination and, 578, 581–82
X-linked adrenoleukodystrophy
mammalian peroxisomes and, 316–17
X-ray crystallography
amyloid structures and protein misfolding, 343
asparagine synthetase chemotherapy and, 642, 646
cold-adapted enzymes and, 420–21, 427
death-associated protein kinases and, 192
Hsp90 molecular chaperone and, 271–90
mitochondrial ADP/ATP carrier and, 715
NADH:quinone oxidoreductase (complex I) and, 79
protein motion and catalysis, 530–33
proton transfer through respiratory complexes and, 176, 178
rhodopsin and, 754–58
ribonucleotide reductases and, 685–86
transmembrane traffic in cytochrome b_6f complex and, 769–71, 773, 786
Xylanase
cold-adapted enzymes and, 407, 410, 420–22
Xylose isomerase
cold-adapted enzymes and, 417

Y

Yarrowia lipolytica
NADH:quinone oxidoreductase (complex I) and, 73–74, 76, 79–81, 84, 86
Yeasts
amyloid structures and protein misfolding, 339–40, 346
animal cytokinesis and, 560
asparagine synthetase chemotherapy and, 635
break-induced replication and recombinational telomere elongation in yeast, 111–32
chromosome and plasmid segregation, 211, 217–18, 222, 227, 230–33
eukaryotic signaling circuits and, 662
gene expression regulation and chromatin modifications, 248–49, 251, 253, 259
history of research, 13
LKB1-dependent signaling pathways and, 144
mammalian peroxisomes and, 295–325
NADH:quinone oxidoreductase (complex I) and, 70, 73–74, 76, 79–81, 84, 86
ribonucleotide reductases and, 684, 693–94, 699
sirtuins and, 436, 438–40
telomerase reverse transcriptase and, 495–97, 500, 502–5, 508–9
yjbHGFE operon
capsular polysaccharides in *E. coli* and, 53
ymcABCD operon
capsular polysaccharides in *E. coli* and, 52–53

Z

Zellweger syndrome
mammalian peroxisomes and, 315–18, 320
ZIP kinase (ZIPk)
death-associated protein kinases and, 189, 191, 193, 195–97, 202–4
